Trainers

Prof. Justin Wu, Prof. Siew Ng, Dr. Raymond Tang, Dr. Kelvin Lam & Ms. Phyllis Lam

Course coordinators

Prof Martin Wong, Ms Jessica Ching & Mr. Thomas Lam

Overview

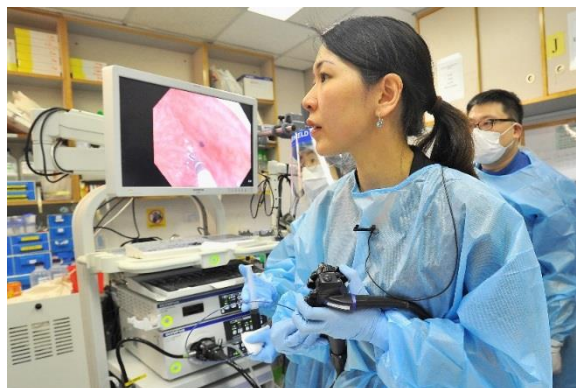

The incidence and mortality of colorectal cancer (CRC) are on a rising trend globally. It is currently the most common cancer in Hong Kong. Screening flexible sigmoidoscopy is a cost-effective strategy to reduce both incidence and mortality of CRC.

Objective

To provide flexible sigmoidoscopy training for primary care providers to promote colorectal cancer screening

Course details

- Didactic lectures on epidemiology and screening strategies of CRC and principle of lower GI endoscopy (weekend)
- Observation and simulation
- Hands-on training; and
- Assessment on independent performance of flexible sigmoidoscopy

The training equipment are supported by Olympus Hong Kong and China Limited

Time Frame

Approximately 4 months

CME and CNE points will be accredited.

Co-organizers

The Hong Kong College of Family Physicians
The Provisional Hong Kong Academy of Nursing Limited

香港中文大學醫學院
